

Calendar Math Skills need to continue for this year. These skills are critical for repetition and embedded skills and content that are not covered by Common Core...

*** This should be done at the beginning of the day and only for 10-15 minutes NO MORE!!!**

Continue with January elements:

- Computations and Connections: explore multiples of 3 & create number stories and develop strategies for multiplication and division facts.
- Measurement: understand area and perimeter & discover if figures with the same area have the same perimeter.
- Counting Tape/Hundred Chart: compare numbers using the greater and less than symbols & recognize number and multiple patterns.
- Daily Depositor: examine sums of numbers in sequence & express large numbers in various notations.
- Coin Counter: know and count coin value; use mental math to compute change from purchases; record money amounts.
- Graph: collect and organize data & read and interpret graphs.

When February comes around begin February elements:

- Computations and Connections: explore multiples of 4 & create number stories and develop strategies for multiplication and division facts.
- Measurement: explore using ounces, cups, pints, and quarts & develop referents for estimating capacity.
- Counting Tape/Hundred Chart: identify multiples of 4; group, count, and divide by 4; practice mental math.
- Daily Depositor: examine another strategy for adding numbers in sequence & practice mental addition and subtraction.
- Coin Counter: know and count coin values & create an organized list to solve a problem.
- Graph: collect and record data & examine relationships between sample size and experiment results.
